# PART I - ENGLISH

Note: Circle the one best answer to each question.

## I. Answer questions 1-7 after reading the following text.

However important we may regard school life to be, there is no disputing the fact that children spend more time at home than in the classroom. Therefore, the great influence of parents cannot be ignored or discounted by the teacher. They can become strong allies of the school personnel or they can consciously or unconsciously hinder and thwart curricular objectives.

Administrators have been aware of the need to keep parents apprised of the newer methods used in schools. Many principals have conducted workshops explaining such matters as the reading readiness program, manuscript writing and developmental mathematics.

Moreover, the classroom teacher, with the permission of the supervisors, can also play an important role in enlightening parents. The informal tea and the many interviews carried on during the year, as well as new ways of reporting pupils' progress, can significantly aid in achieving a harmonious interplay between school and home.

To illustrate, suppose that a father has been drilling his son in arithmetic processes night after night. In a friendly interview, the teacher can help the parent sublimate his natural paternal in-

terest into productive channels. He might be persuaded to let the boy participate in discussing the family budget, buying the food, using a yardstick or measuring cup at home, setting the clock, calculating mileage on a trip and engaging in scores of other activities that have a mathematical basis.

If the father follows the advice, it is reasonable to assume that he will soon realize his son is making satisfactory progress in mathematics, and at the same time, enjoying the work.

Too often, however, teachers' conferences with parents are devoted to petty accounts of children's misdemeanors, complaints about laziness and poor work habits, and suggestion for penalties and rewards at home.

What is needed is a more creative approach in which the teacher, as a professional adviser, plants ideas in parents' minds for the best utilization of the many hours that the child spends out of the classroom.

In this way, the school and the home join forces in fostering the fullest development of youngsters' capacities.

The central idea conveyed in the above passage is that

(A) home training is more important than school training because a child spends so many hours with his parents

(B) teachers can and should help parents to understand and further the objectives of the school

(C) parents unwittingly have hindered and thwarted curricular objectives

(D) there are many ways in which the mathematics program can be implemented at home

(E) there is not sufficient individual instruction in the classroom

3. It can reasonably be inferred that the author

(A) is satisfied with present relationships between home and school

(B) feels that the traditional program in mathematics is slightly superior to the developmental program

(C) believes that schools are woefully lacking in guidance personnel

(D) feels that parent-teacher interviews can be made much more constructive than they are at present

(E) has the opinion that teachers of this type are inferior to those of the

not mentioned

The author implies that

- ☒ (A) participation in interesting activities relating to a subject improves one's achievement in that area
- (B) too many children are lazy and have poor work habits
- (C) school principals do more than their share in interpreting the curriculum to the parents
- (D) only a small part of the school day should be set apart for drilling in arithmetic
- (E) teachers should occasionally make home visits to parents

6. The author's attitude toward supervisors is one of

- (A) disdain

(B) indifference

(C) indecision

(D) suspicion

☒ (E) approval

7. We may infer that the writer of the article does not favor

(A) a father's helping his son with the latter's studies

(B) suggestions by the teacher to a parent in regard to improving the student's scholastic average

(C) written communications to the parent from the teacher

☒ (D) having the parent observe lessons which the children are being taught

☒ (E) principal-parent conferences rather than teacher-parent conferences

PK

At our Library Science Department (in Faculty of Letters  
Ankara) we studied Librarianship lessons four years and  
<sup>Beside this</sup> we studied two another department's lessons (Turkish  
Language and Literature - Persian) and English lessons  
for first two years. Every student had to have two other  
departments' lesson which maybe he (or she) never will  
use these branches' knowledge. In my opinion there must  
be some speciality in Library Science undergraduate  
education. Some professorships must be established  
according to library types (university, <sup>research</sup> public, school,  
children), <sup>manuscript,</sup> and students should train in one field  
which she or he would work in this field's library. If this  
is done Turkey's Librarians need will be obtained easily.  
I am a university librarian now, if I had to studied  
English in stead of Turkish Language and Literature and  
Persian it would be better for me. Beside this matter,  
English lessons for <sup>first</sup> two years are few for library science  
students. Because of the this science's language is  
English there must be increase these lessons.

PART III

Note: Circle the one best answer to each question.

A. Questions 1-3 are to be answered with reference to the following illustrations:

Here are three views of a single cube:

What symbol is opposite the dot?

1. ☒ (A) circle  
(B) cross  
(C) square  
(D) waves  
(E) star

2. What symbol is opposite the cross?

- (A) circle  
(B) dot  
☒ (C) square  
(D) waves  
(E)

B. Questions 4-7 are to be answered with reference to the following explanatory paragraph.

Suppose in the place of a number system a symbol system were instituted which had digits  $\square, \wedge, \bar{z}, \bar{x}, \bar{s}, \bar{a}, \bar{r}, \bar{x}$  and  $\ominus$  corresponding respectively to the digits 0, 1, 2, 3, 4, 5, 6, 7, 8 and 9. The digit  $\square$  is used in the same fashion as the 0 in the decimal system, e.g.,  $\wedge\square = 10$ .

4. Which is equal to  $10^2$ ?

- (A)  $\wedge\square\square$
- (B)  $\bar{a}\bar{r}$
- (C)  $\wedge\square\wedge$
- (D)  $\bar{s}\bar{x}$
- (E)  $\bar{x}\square\wedge$

5. What is the sum of  $\bar{r} + \bar{a} + \bar{x}$ ?

- (A)  $\bar{z}\wedge$
- (B)  $\wedge\bar{x}$
- (C)  $\bar{x}\bar{r}$
- (D)  $\wedge\bar{a}$
- (E)  $\wedge\wedge$

4      6      3

6. Which of the following indicates three-quarters of an inch?

- (A)  $\frac{\bar{s}}{\wedge\square}$  inches
- (B)  $\frac{\bar{a}}{\bar{x}}$  inches
- (C)  $\frac{\bar{r}}{\wedge\square}$  inches
- (D)  $\frac{\bar{a}\bar{r}}{\wedge\square}$  inches
- (E)  $\frac{\bar{a}\bar{s}}{\bar{r}\bar{r}}$  inches

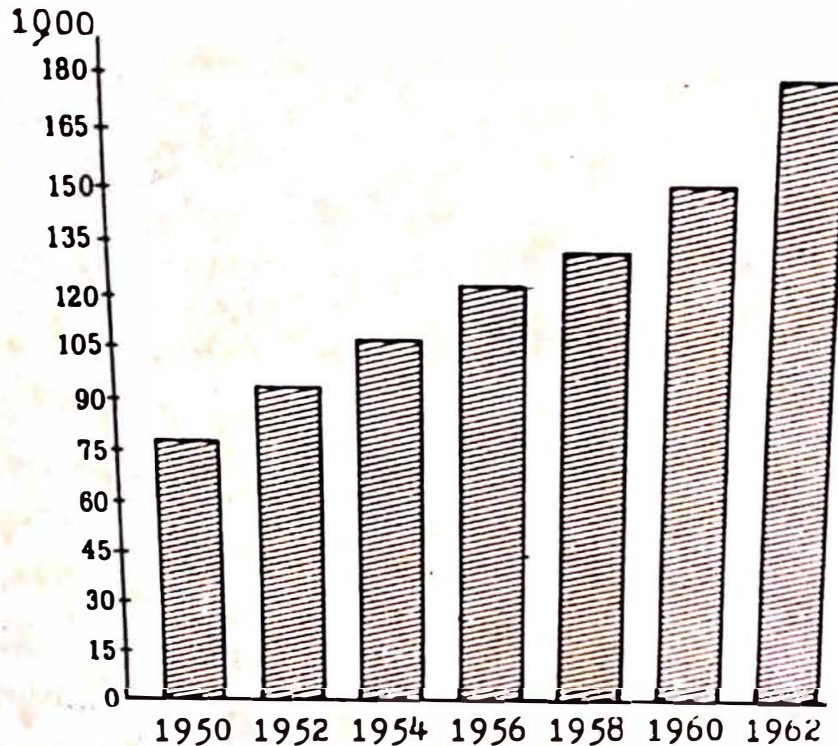

7. What is the value of

$$\frac{\bar{r}\bar{a}\bar{r}}{\bar{r}\bar{r}\bar{r}} ?$$

0

- c. Questions 8-12 are to be answered with reference to the following bar graph:

Library Collection Size 1950-1962

8. What is the percent increase in collection from 1950 to 1962 (approx.)

(A) 100  
(B) 110  
(C) 115  
(D) 120  
(E) 135

9. In how many years after 1950 did the collection double?

(A) 4  
(B) 6  
(C) 8  
(D) 10  
(E) 12

10. The largest increase in collection was in the 2 years ending

○

MASTER'S DEGREE

ENTRANCE EXAM

September 1973

1. What significance does the word "Cutter" have to librarianship?

☐ It is a process for cutting pages when binding books.

☒ It is a name given to a scheme used to separate books on the same subject.

☐ It is the name of a famous German librarian.

☐ None of the above.

2. Give the name of the largest manuscript library in Turkey:

Süleymaniye Manuscripts Library.

3. Where might you look to find all the in-print titles published to date in the Oxford English Novels Series (a series of novels being reprinted by Oxford University Press)?

Oxford University Press Catalogue.

4. Name one significant weakness of a one-card circulation system.

5. Public libraries in Turkey are under the administration of:

☐ Milli Kütüphane

☒ Kütüphaneler Genel Müdürlüğü

☐ Other

6. If you wanted to find a book by Lord David Cecil what would you look under in the public catalog?

Cecil, David

7. "Reference books should never circulate"

a. Defend this statement. Because they have prepared for to obtain short information in the library in a short time

b. Attack this statement. If reader's have not time to use in the library he doesn't use them.

8. Give the title of the cataloging rules that is being used currently at the public libraries in Turkey:

Kitap Kataloqlama Kuralları (Basma Eserler Alfabetik Kat. Kuralları değı)

9. What is the difference in function between a "see" reference and a "see also" reference?

1/2 ✓ If one subject is important than other "see" reference is used, if two subjects are important in the same time "see also" reference is used.

10. If you want to begin developing a comprehensive collection of books in technology in English where would you look for collection cost estimates?

☐ Library Journal

☒ Books in Print

☒ Bowker Annual

☐ Winchell's Guide to Reference Books

☐ All of the above

11. What are the covering dates for Türkiye Bibliyografyası and Türkiye Makaleler Bibliyografyası?

Türkiye Bib.: 1928-1972 Türkiye Makaleler Bib.: 1952-1972

12. Where would you look to see from what American library you might borrow a copy of American Libraries?

13. The MARC Program is important, because: (Select the best answer)

☐ It provides a marking service for all books added to the collection.

☐ It provides subject headings which can be used by all kinds of libraries.

☐ It will automatically catalog Turkish books.

☒ It provides selecting information in a computerized form.

İbrahim Müteferrika who established...

14. The counterpart of American Library Association in Turkey is:

Türk Kütüphaneciler Derneği

15. Name two disadvantages of using the L.C. Classification system for a small library.

1. Because L.C. Classification is for big libraries
2. L.C. Classification have much subject detail for small libraries.

16. The bottom of each page of Webster's Unabridged Dictionary has a second list of words and definitions. Where would you look for an explanation of this separation?

Winchell, Guide to Reference Books.

17. Which edition of Dewey Decimal Classification System is being currently used in Turkey?

☐ 15th    ☐ 17th    ☒ 18th    ☐ 19th

18. You have been asked to locate an authoritative recent bibliography of works by and about the American writer Henry James in a library. Where would be the first place you would look for this information?

Card Catalogue under the subject American Literature

19. What do the British Museum and the Bibliothèque Nationale have in common?

They collect the books and journals which they print in their countries

20. Is there any difference between the Anglo-American Cataloging Rules and the Basma Eserler Alfabetik Katalog Kaideleri for pseudonyms?

B.E.A.K.K. doesn't accept the pseudonyms, so it accept only real name  
Ang-Amer.C.R. accept real name but it shows "see also" reference from

21. You wish to find the bibliographical information including pagination for an out-of-print book. Where might you look?

Out-of Print Book Catalogue of Thomas Thorp.

22. Identify the Turkish counterpart of Gutenberg:

İbrahim Müteferrika who established the printing press in 1727

30. In what way is Türkiye Bibliyografyası different from Rooke in Print ?

Türkiye Bibliyografyası is arranged by Dewey Classification. B.I.P. is arranged by alphabetically under the authors, titles and subjects.

31. A library is divided into the following departments: Material selection, acquisitions, collection identification, reference and lending.

a. Which department(s) need subject specialists?

Material selection called by 14

b. Which department(s) must know the subject interest of users?

Reference and lending

c. Which department can be expected to handle the accounting problems related to collection building?

Reference

d. Which department is the most interested in the habits of users?

Lending.

32. Give the title of a completed encyclopedia in Turkish.

Hayat Ansiklopedisi

33. Name two advantages and two disadvantages of a computerized book catalog as opposed to a card catalog.

Advantage: 1. It is faster and more accurate.

2. It is more convenient and easier to use.

Disadvantage: 1. It is more expensive.

2. It is more complicated and requires more training.

34. What are the main problems in the field of library science and information science in Turkey at present time?

a. In library science and information science in Turkey at present time the main problems are the lack of qualified personnel and the lack of adequate facilities and equipment for research and teaching purposes in the field of library science and information science in Turkey at present time.

b. In library science and information science in Turkey at present time the main problems are the lack of adequate facilities and equipment for research and teaching purposes in the field of library science and information science in Turkey at present time.

Library science and Technical Research Institute Library Catalogue works.
